

# CONTINENTAL PUMP REBUILD

C&C Hydraulics, LLC • 77 South 6th St., Colbert, GA • 706-788-2082

**C & C Hydraulics is a Service Repair Center for Continental Pump**

- **We have:** As New Warranty
- **& “Swap out” pumps available**

**SAVE UP TO \$1000 ON A CONTINENTAL PUMP!**

For many years, C&C Hydraulics has taken pride in the fact that we help our customers with their problems. That is why we are offering the service of rebuilding Continental Pumps, especially the **PVR50-50 and PVR50-70 Series** pumps. We have a state of the art test stand that is designed specifically to test the Continental pumps. We set the flow and pressure to the factory specs, so when the pump arrives at your plant, it is ready to install on your power unit and go to work. All moving parts are replaced to make sure you have a pump that is as good as new.

**We are saving plants up to \$1000.00 per pump over buying a new pump!**

We offer a pick up and delivery service in our area and are set up with a number of freight lines to get your pumps back to you in a timely manner. We keep pumps in our stock for “swap out” to serve you even faster. And, of course, we rebuild several other lines of pumps, motors, cylinders, etc. So give us a call at C&C Hydraulics and we can get your Company saving money, too.

**C&C Hydraulics, LLC
